A Determination to Press Forward The Negro World to the Pinnacle of Human Progress

Fellowmen of the Negro Race, Greeting:

There comes a time in the life of every race, or history of every nation, when a decisive stand must be taken for the preservation and good and well being of that race and nation. Such a time has come in the life of the Negro, because of which we are now sounding the clarion call of race unity, love, and pride, hoping that the four hundred million members of our race will respond, so as to make it possible for us to look the future , in the face with a united front.

The world is in a state of re-organization wherein each and every group of the great human family seeks an expression of its own will. The keenness of the age brings out a rivalry among races and nations that make ir possible for only those who are strongly organized and well prepared,

to survive out of the eternal conflict.

It is in such a competition that the Negro is called upon this time It is in such a competition that the Negro is called upon this time readers of the NEGRO WORLD shall to play his part. We must as a people decide for ourselves now, whether know that no time or expense is we shall go forward or backward in the competitive program of races and spared in making their paper interto play his part. We must as a people decide for ourselves now, whether

Once upon a time our race indulged in the security of human charity and sympathy, but today the world is void of these kind attributes, and we are forced either to do for ourselves or die in being relegated to the scrap heap of humanity. The space accommodation for races and nations is becoming so narrow and circumscribed as to suggest that in a short while only the fittest of the great human groups will survive, and weaker ones having perforce to die or move off, to make room for those who are strong enough to hold their own.

Shall the Negro Be Exterminated?

This is the calamity of extermination that faces the Negro, and it is for that that the Universal Negro Improvement Association is organizing the world over, so that through the united course we can so settle our-selves as to ensure our permanent existence. We cry out for a united Africa, for a liberated country. The sentiment has made the circuit of the world, but still there are millions who have not yet made up their minds bill imposing a 10 per cent duty on to join in the holy crusade. It is for them, that those of us who make up all imports into Great Britain, with the Universal Negro Improvement Association labor, because we, who have caught the vision, cannot have it realized without the assistance of those who suffer with us, because they are of our kind. Hence, our effort is to convert them to the way of seeing things as they are, and realizing that it is only through united effort on the part of all Negroes, that we can truly free ourselves and liberate our country.

The cry of Africa for an autonomous place in the world is becoming louder and louder. The echo has reached the remotest parts of the world, and now men, races and nations are thanking more than over before of the possibilities of a new African nationality. The Universal Negro Improvepossibilities of a new African nationality. The Universal Negro Improvement Association is responsible for this change. It is the sole expression of a new and ambitious race out of which rises a manhood that refuses to take a second place in the affairs of men, but is determined to press on and forward until the race is elevated to the highest pinnacle of human

Many have thought us crazy and unreasonable in declaring for Africa for the Africans at home and abroad, but the principle of an independent African nationality for Negroes is not one that has been originated by the Negro himself, but only copied from the other races in their cry of Asia for the Asiatics, Europe for the Europeans, America for Americans.

Nature Made Us Masters of Our Own Destiny

The Negro seeks liberty in the truest sense and fullest meaning. world must know that the son of Africa is no longer disposed to be crushed, ignored and relegated to the back seat of human society. He wants a place in the forefront, and is determined to be heard. The world may wonder at this change in the race's attitude, but what else can the world expect? Even though our fathers slept for centuries, we of this day do not make up our minds to indulge in the slumber of the ages that would but keep us as serfs, peons and slaves. We have heard the rattling cry of liberty, the timbrel sound of democracy for which all present day races and nations are working with the fullest hope and satisfaction the near future, but it would be "a that they shall enjoy without molestation or circumscription. The sons and normal herald of the return of world daughters of Africa are too many to allow themselves to be deprived of prosperity and not, as the Opposition these valuable essentials to human happiness, human progress and human was certain to represent, due to the salvation. We feel as a people that the privileges and opportunities enjoyed by others should also be enjoyed by us in that nature made us as heirs in common to this glorious Creation in which we find ourselves and in which we know no other master but the Creator. In all things physical we are determined to master our own destiny, and direct our own affairs In the things that are spiritual we leave ourselves entirely to the will of God, but in the new philosophy we feel that if we must rise to heights of material glory we must accomplish that only upon our own physical endeavors and in that direction four hundred million Negroes are now bent under the leadership of the Universal Negro Improvement Association. May I not inspire the millions who have not yet come in touch with

this grand and glorious movement to now link up and join hands with us in carrying out the program of race emancipation and national re-demption? May I not beseech the scattered sons and daughters of Ethiopia to rally to the glorious colors of the future African State—the Red, regular Cleveland catcher for years, Black and the Green? May I not point you to the hope of a new born kept guard to prevent sore arms, day, wherein the Negro shall see the light of his own future happiness O'Neill, manager of the Toronto Inand the glory of his own risen race? We need courage, we need greater manhood, a stronger manhood in our race, and we feel sure that the propaganda of the Universal Negro Improvement Association will so change the mind and heart of man, as to make us all see things ancw, see them with the vision of the prophet that in our own time, and that of our posterity, we shall once more elevate outselves to the height of na- Hitler to Run Against tional independence that will make men of other races accord us the regard and respect merited by our racial contribution to a progressive

Evolving a New Civilization

The Negro at this time is called upon to evolve a new civilization and establish firmly a culture of his own. We must be original, we must be productive, we must be creative. There is room for the Negro to make his independent contribution to the affairs of men, and the Universal Negro Improvement Association believes that in Nature's good time we shall resurrect ourselves from the buried ages and restore to the world in ancient civilization, a glory once boasted by our fathers.

In ancient civilization, a glory once boasted by our fathers.

The white world may try to rob and discredit us of the things in history we claim as our own.

They may tell us that the ancient civilizations were claim as our own.

They may tell us that the ancient civilization the first balloting for the presidency on March 13, in which the Pr make the truth unreal. Every student of history, of impartial mind, knows that the Negro once ruled the world, knows that the Negro once gave civilization to mankind, knows that when the white man knew not himself other than that he was a savage, a barbarian and a caveman, that the Negro stood at the very height of civilization. That power and sway we once held, passed away, but now, in the 20th century, we are about to see a return of it in the rebuilding of Africa, yes, a new civilization a new culture shall spring up from among out people and the Nile shall once more flow through the land of Science, of Art, and of Literature, (Continued on Page Six)

Isaac Foot, Liberal Minister of Mines, and Sir Stafford Cripps, one of the Labor party's leaders, made final bitter graceless. final bitter speeches against the tariffs before the bill passed the third nd final reading.

Cries of "Resign! Resign!" were shouted at Mr. Foot when, forty-five minutes before the bill and to be out of the way, he arose and arraigned the imposition of tariffs. He declared that once a country adopted tariffs it had "sweat blood" before it could get rid of them.

When the government majority of 80 votes was announced, members of the House of Commons rose and cheered Neville Chamberlain, Chancellor of the Exchequer. In a sense it was a family victory, since his father, Joseph Chamberlain, a generation ago had fought so long but vainly to make Britain a protectionist country.

Several ships raced to English ports in the week just past with goods to unload before the imposition of the first duties Tuesday. Among them was the Berengaria with a cargo of

tinned goods. In closing for the government Mr Chamberlain warned that the prices of commodities probably would rise in tariff measure."

Among the imports exempted from per cent tariff are cotton wheat, corn and coal.

H. discuss your favorite and national headquarters, and citi-picture, play and player in your own zens. Besides exercises held at the death-spot, grave and monument, a movement has been started for a law to have March 5 proclaimed annually by the Governor for observance of

Crispus Attucks' death. A petition is to be presented to the Leislature. In a final appeal to all churches, fraternal, civic, literary and patriotic bodies of the race to publicly observe March 6 (March 5 coming on Saturday) as "Attucks and Citizenship Foundation Day," the league claims that if properly utilized, Attucks and his death can be made the most effective of all propaganda for advocacy of full citizenship. The race is urged to thus make it known that a olored man conceived, led and gave first life-blood in, the first organized strike at British rule, the first event to incite the colonists to fight for independence, founding the republic on our race blood.

Warns of Bloodshed If Negroes Go Back South

Warning of starvation and blood-shed if Negroes should be returned Sullivan, reputed to be close to the administration, a Southern clergyman has written a frank letter to the National Association for the Advancement of Colored People, The clergyman, who writes from Alabama, says in part:

"We that are here can't hardly get bread. Our wages are as low as 10 have to advance them. Then where is any room or food for the hundreds of thousands coming from the North?

. . . To ship them down here and turn them loose naked-handed in this depression, you might as well knock them in the head up there, for they are not wanted here by the Southern white man because many of them will try to sustain Northern ules when they come back South, which will cause great bloodshed be-tween white and colored here."

W. I. Negroes Alone Seek It!

RICHMOND, Va.—Dean Gordon C. Hancock of Virginia Union Univer-sity last week sent an open letter to the Virginia State Legislature strongly protesting against the colonization bill recently introduced into the Legislature. The bill, which was refered to the committee on federal relations, proposes memorializing the United States Congress to make some arrangement for the voluntary emigra-tion of the American Negroes to Liberia or some other part of Africa or the West Indies and thus solve the ace question in America.

Dean Hancock lashed bitterly the proposed bill and stated that it not only did not have any support among our people but that it was utterly condemned by them. A part of Dean

Hancock's letter is as follows:

"As a citizen of Virginia and of
the United States I take this occasion to protest against the Negro colonization bill which was recently placed before the House Committee on federal relations and resolutions.

"The sponsors and advocates of the bill intimate that they are acting in response to persistent demands of the Negroes themselves. Their supporting evidence is not conclusive, for the basis of the petition is laid in the Garvey movement, which he since has waned.

"Moreover, the Garvey movement is not now, and never was, a movement of American Negroes, but of West Indians. The sentiment, therefore, of the Garvey movement cannot be construed as the sentiment of American Negroes, upon whose demand alone should a colonization scheme be launched.

"If a million West Indians, led by Marcus Garvey, wish an African em-pire, it is no matter for the Negroes of American birth and citizenship, and if the General Assembly of Virginia proposes to provide an African empire for British subjects, let that be so understood."

On Saturday evening, February ment have given definite assurance that they have no territorial ambitions in China and that they will uptions in China and that they will uption to the china and that they will uption the china and that they will uption to the china and that they will uption the china and the tensive trip. Did those boys look great in their tuxedos! Well, the hall was decorated in red, white and blue, and it was a pretty sight to behold. These decorations were ac credited to Mr. Marshall of the Alwyns, who sure does know his--interior. . . . Quite an unusual pro-gram. The Four Flash Devils, from Smalls (you all know how those boys can dance). Then a novelty number on roller skates, by Mr. Eason. A pretty little piece of brown, rendered a song, Miss Fay Canty. Mr. Jas. Putnam is president of this well known group.

> Also on Saturday evening the Colonade Social Club fairly packed the Witoka. This group is fast becoming one of the most popular clubs in the Harlem sphere. The officers in the Harlem sphere. of this club are as follows: Free Richardson, President; Joe Berkley, Vice-President; P. Brathwaite, Fin. Sec.; Al Blackman, Rec. Sec.; A. Burt, Treasurer; Gerald Wilkinson, A. Earle, Publicity Managers, and G. Young, Advocate. This club will have to give their next affair in a much larger place, if they want to cater to all their public. Some popular group, I'll say.

Mr. and Mrs. Thomas H. Edwards and their two sons, seven and eight years old, sailed from the United States on October 2nd for Liberia Mrs. Edwards was expecting the stork to arrive at Liberia in December, but unexpectedly, the stork arrived at Cadiz, Spain.

They had a very tiresome trip, af ter sailing out from the United States. They reached Havre, France, on the 10th, from there took a train to Paris, which lasted for four hours. Changing to a bus for Iran, they took a train at Iran to Madrid, Splain changing again for Cadiz, Spain, arriving there on the 14th.

The stork arrived with two sons on the 17th at 12:30 a.m. Mother and new arrivals were doing well until the 20th. At 11:30 a.m. one passed away and was laid to rest in Cadiz, at which the couple were very much grieved.

On this very date they had to sail from Cadiz for Liberia, arriving at Liberia on the 31st of October. Both mother and new arrival were in good condition. Mr. and Mrs. Edwards regret very much that their sons were not born in Liberia. This disappointment was caused from the tiresome trip, hence, the stork arrived at seven months.

Those of us here in Liberia congratulated Mrs. Edwards for her courage, and hope that she will be an inspiration to other mothers, who can see with her, to build an inde pendent future for her children, that when they have come to maturity, they will be able to reap the good from the sacrifices that she has made

We welcome Mr. and Mrs. Ed wards and their children to own their native home, and wish them all the blessings of life.
